#### Notes:

- All components and board processes are to be ROHS compliant
- All capacitors are 10% tolerance unless otherwise stated
- All resistors are 5% tolerance unless otherwise stated
- All zero ohm links are 0603
- All connectors and headers are denoted Px and are
- 2.54mm pitch unless otherwise stated
- All jumpers are denoted Jx. Jumpers are 2mm pitch
- Jumper default positions are shown in the schematics. For 3 way jumpers, default is always posn 1-2 2 Pin jumpers generally have the "source" on pin 1
- All switches are denoted SWx
- All test points (SMT wire loop style) are denoted TPx
- Test point Vias (just through hole pads) are denoted TPVx
  - 3 Different test points used in design:

TPVx - Through Hole Pad small

 $\mbox{TPHx}$  - Through Hile Pad Large (for standard 0.1" header). Also used on IO Matrix (IOMx)

TPX - Surface Mount Wire Loop

User notes are given throughtout the schematics.

Specific PCB LAYOUT notes are detailed in ITALICS
